

Researcher | Data Analysis & Statistical Modeling

SUMMARY

Researcher with an M.S. in Environmental Science and Engineering from POSTECH and experience managing, validating, analyzing, and interpreting multi-source research data. Skilled in Python, R/RStudio, statistical analysis, data visualization, machine learning, and scientific reporting, with research experience spanning environmental health, population-level health impact assessment, and human-participant survey research. Brings over six years of professional experience in product development, project management, cross-functional collaboration, stakeholder coordination, quality assurance, and digital content development.

EDUCATION

Master of Science in Environmental Science and Engineering Sep 2024 - Aug 2026

Pohang University of Science and Technology (POSTECH), South Korea

- GPA: 92.7/ 100
- Relevant Coursework: Environmental Statistics, Environment & Health, Big Data for Environment, Research Ethics, Scientific Writing, Deep Learning.

Bachelor of Chemistry (Honours) Sep 2014 - Sep 2019

University of Yangon, Myanmar

- GPA: 95.4/100

RESEARCH EXPERIENCE

Graduate Researcher | Air Pollution Laboratory, POSTECH, South Korea

- Managed and integrated multi-year datasets from ground monitoring, meteorological reanalysis, satellite observations, population data, and mortality-related sources. Sep 2024 - Aug 2026
- Applied data validation and quality-control procedures, including completeness checks, missing-data assessment, QA filtering, and consistency checks.
- Performed statistical analysis using Python and R/RStudio, including descriptive statistics, correlation analysis, generalized additive models, sensitivity analysis, and visualization.
- Conducted a population-level PM_{2.5} health impact assessment using population data, baseline mortality rates, and epidemiological exposure-response coefficients.
- Produced statistical summaries, tables, figures, maps, and research interpretations for thesis research, conference presentation, and a first-author peer-reviewed publication.

Group Research Project | Doing Research Program, Parami University

- Collaborated on an observational public-health study examining generator and fuel use among Yangon residents during power outages and associated health concerns. Mar 2022 - Aug 2022
- Contributed to study design, convenience sampling, participant-level data collection, analysis, interpretation, and reporting on respiratory, heat, and noise-related impacts.

PROFESSIONAL EXPERIENCE

360ED | EdTech Social Enterprise

Localization Project Manager (Remote| Project-Based)

Jul 2025 - Aug 2026

- Led localization of the English demo version of a Grade 5 Science application, coordinating translation, review, application testing, and implementation.
- Coordinated cross-functional review and delivery to ensure product consistency and quality.

Content Development Specialist (US| Remote| Project-Based)

Jan 2024 - May 2025

- Developed, organized, and quality-reviewed structured educational content, assessments, visuals, and multimedia assets.
- Coordinated review and revision with subject specialists, designers, animators, and technical teams.

Education Product Manager (Remote| Full-time)

June 2021 - Dec 2023

- Led development of Elements AR, overseeing educational content, product features, design, media, testing, and technical implementation.
- Managed the Grades 6–8 Open Learning Resources project, coordinating timelines, deliverables, quality review, and communication with PADECO, DoOR, and UNICEF.
- Contributed to 360ED’s portfolio of digital learning products reaching more than 1.2 million learners.

Junior Product Officer (Myanmar | Full-Time)

Nov 2019 - May 2021

- Tested and improved science learning applications and educational materials, supporting UI/UX, educational game design, and integration of science content into digital products.
- Produced science experiment and instructional videos to support student understanding and engagement

PUBLICATION & PRESENTATION

- Myat, M. M., & Lee, H. J. (2026). Integrated Assessment of Air Pollution Dynamics and Health Impacts in Myanmar: Evidence from Ground Monitoring, Satellite Observations, and Modeling. Environmental Pollution, 408, 128918. DOI: [10.1016/j.envpol.2026.128918](https://doi.org/10.1016/j.envpol.2026.128918)
- Oral Presentation, KOSAE Fall Conference | Oct 2025

AWARDS & SCHOLARSHIPS

- Global Korea Scholarship (GKS), Government of the Republic of Korea | 2023
- Dr. Maung Maung Htay Scholarship, University of Yangon | 2021
- Academic Excellence Awards, University of Yangon

SKILLS

- Data & Statistics: Python, R/RStudio, Data Cleaning & Validation, Data Quality Control, Statistical Analysis, GAM, Sensitivity Analysis, Data Visualization
- Health & Research: Health Impact Assessment, Population-level Exposure Assessment, Epidemiological Evidence Interpretation, Scientific Reporting
- Geospatial: ArcGIS, Remote Sensing, Geospatial Analysis & Visualization
- Professional: Product Development, Project Management, Quality Assurance, Cross-functional Collaboration, Stakeholder Coordination
- Languages: Myanmar (Native) | English (Advanced) | Korean (TOPIK Level 4)
